

Installation guide of SIT-VPN client for Microsoft windows 10/11

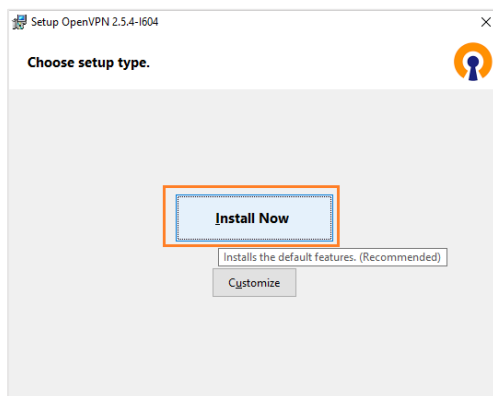

1. Extract the sitvpn4st.zip to your hard drive

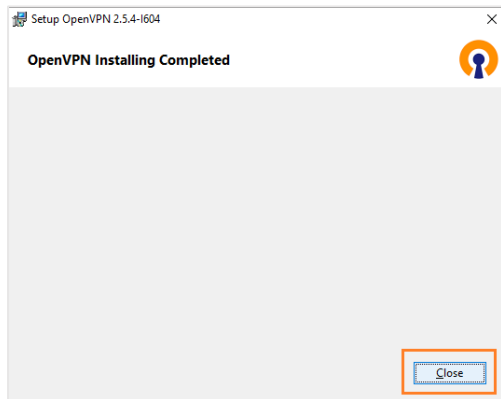

2. Run OpenVPN-2.5.5-I602-amd64.msi by using the right click install

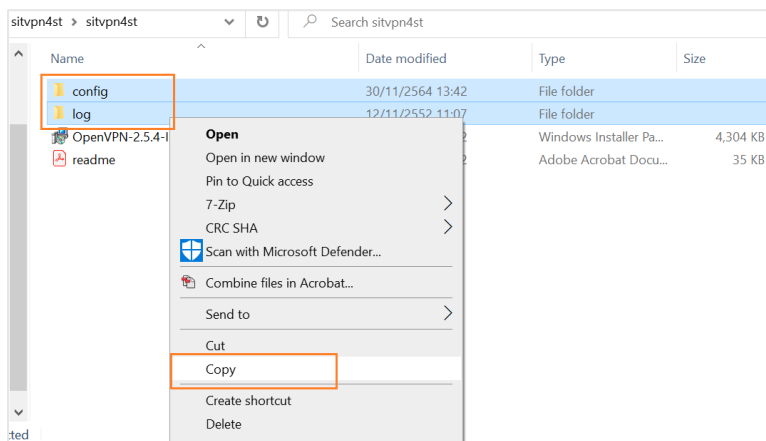

3. Click Install Now button

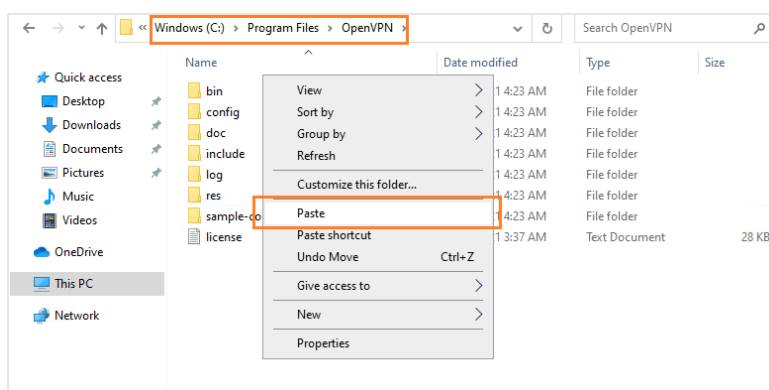

4. OpenVPN installing completed, click Close button to close the windows

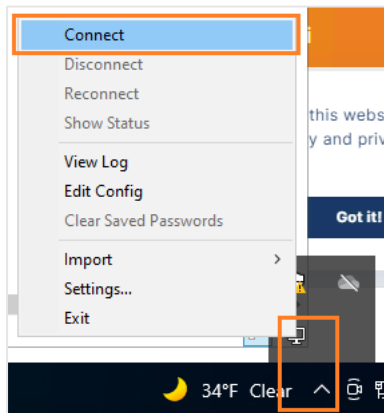

5. Back to the installation files folder, copy two folders that are config folder and log folder

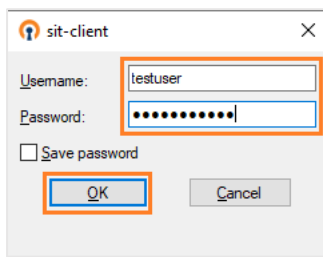

6. Paste them to openvpn application folder which is c:\program files\openvpn\ by default

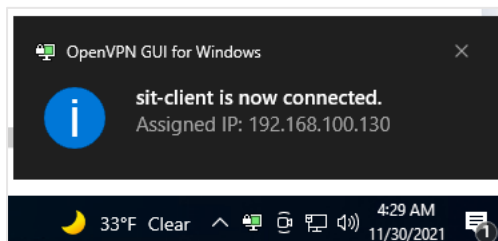

7. At the right-down corner of the screen, expand the hidden icons and right click the OpenVPN GUI icon  and click connect

8. Enter username and password and click OK button

9. Now SIT-VPN is connected

10. Finish install and connect to SIT-VPN
